Editorial

Welcome aboard L'ODDysée d'Hugo! The title blends the Odyssey, that long voyage full of ports of call, with the 17 Sustainable Development Goals the world has set itself for 2030. Our namesake gives us our bearings, since for him progress is a great journey that humanity makes together.

This newsletter aims to inform us, inspire us and make us want to act. It shows what is moving forward at school, in Bulgaria, in France and worldwide, because we move faster when we know it is possible.

No journey is made alone. Students, families, teachers, student life, staff and leadership, everyone has a place on board. This first issue comes from the ESD team, the next ones will be written by our eco-delegates.

Eric, Greg and Julie, ESD coordinators

SCHOOL LIFE

At the LVH, we're moving forward!

Back-to-school highlights and the SDG projects our students are running now

SDG 3 16 SEPTEMBER

The LVH on the move

Football, handball, table tennis and badminton for National School Sports Day, in a spirit of cooperation and sharing.

SDG 16 28 SEPT. TO 2 OCT.

Democracy Week

Delegate elections across secondary. For 6th graders, a first vote in a booth, personal, free and secret.

SDG 16 SDG 17 27 TO 30 SEPT.

Two students at the Nicosia Inter-CVL

With student reps from other schools, they explored engagement and student representation, and now share the experience with the CVL.

Our SDG projects

SDG 12 — ONGOING

Biology, the whole school community

Recycling paper, cardboard, batteries and caps

Middle school eco-delegates and eco-volunteers run the collection points with partner Ecobulpack and measure the amounts recycled.

SDG 11 — ONGOING

Economics, Grade 10 A and B

A cycle lane for Sofia

After an escape game about a stolen bike, students are writing to city services to ask for a cycle lane.

SDG 4 — ONGOING

History-Geography, Civics, Geopolitics and Economics

An international day to open every lesson

Each lesson opens with an international day, such as peace, anti-trafficking or access to information, to spark discussion.

SDG 13 — COMPLETED

Economics, Grade 10 A and B

Climate and scarce resources

Students work with data on growth and emissions and learn to tell correlation from causation.

SCHOOL LIFE

At the LVH, we're moving forward!

Our SDG projects, continued

SDG 5

COMPLETED

History and Civics, Grade 11 A and B

Women in revolutions

Each student made a poster about a woman who fought for rights or peace, from Olympe de Gouges to Leymah Gbowee, for an exhibition at school.

SDG 16

COMPLETED

Geopolitics and Political Science, Grade 11 specialty

An Athenian debate on democracy

Sides and jury drawn by lot, as in Athens. Facing ecological crises, do we need authoritarian power or a reinvented democracy?

SDG 16

COMPLETED

Civics, Grade 8 A and C, Grade 11 A and B, 2 October

A day for non-violence

Awareness posters on the doors of every floor, and anonymous good-luck notes handed out to students and staff at break time.

SDG 16

COMPLETED

Civics, Grade 11 A and B, 16 October

Preventing radicalisation, rejecting violence

In tribute to Samuel Paty and Dominique Bernard, four committees studied a fictional case and proposed prevention measures, at school, in sport and culture, and through the law.

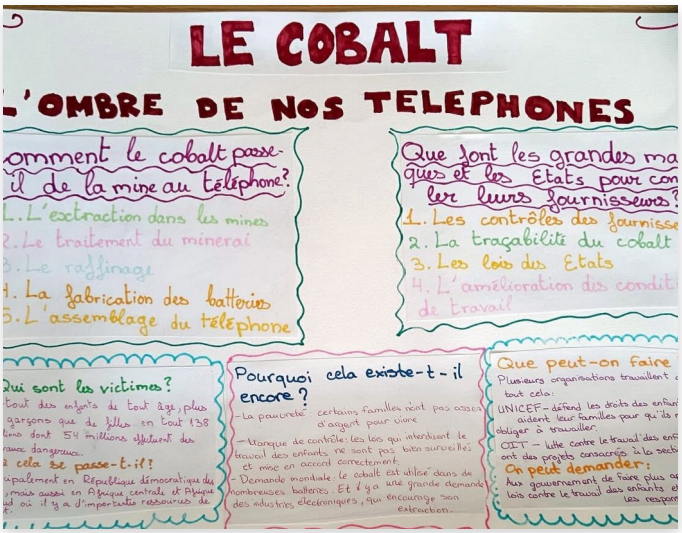

SDG 8

ONGOING

History and Civics, Grade 8 A and C

Operation Broken Chains

Sent on a mission by an imaginary NGO, the Victor Hugo Organisation against Modern Slavery, students investigated Uzbek cotton, child soldiers, Haiti's restavèk children and the cobalt in our phones. Their findings became advocacy posters.

SCHOOL LIFE

At the LVH, we're moving forward!

From 2nd to 12th grade, the whole school is moving forward

SDG 15 SDG 4 *Grade 5, Vitosha Nature Park*

5th graders learn to read the mountain

On their first hike, a loop through the heart of the nature park, students learned to read a map and its key, find their way with a compass and estimate distances using the scale. They even measured the height of a tree with the lumberjack's cross. Learning outdoors means getting to know the nature around us, and so learning to protect it.

SDG 11 SDG 3 *Grade 9 classes, 13 October*

National Resilience Day

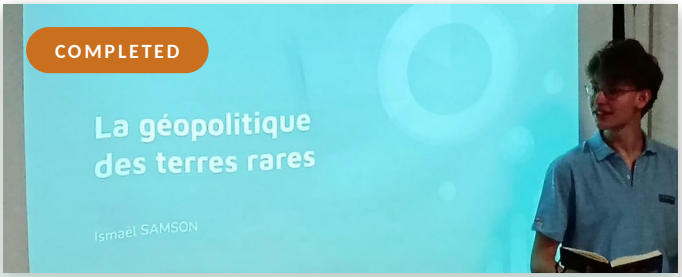

Natural and technological hazards, emergencies, life-saving skills. With our trainer teachers, 9th graders learned the right reflexes to protect themselves and others. Being prepared already makes us stronger together.

SDG 15 SDG 4 *Grade 2 A, science*

Observing and classifying nature

Mineral, plant or animal? Pine cones, pebbles and leaves in hand, our 2nd graders in CE1 A are learning to observe, question and classify the world around them. All year long, they will explore the materials of their environment. Science starts with curiosity!

SDG 12 SDG 8 *Geopolitics, Grade 11*

The geopolitics of everyday objects

Rare earths, T-shirts, trainers, phones. Each student gave a talk on the hidden issues behind an everyday object, from subsidised cotton to garment workshops and the unequal sharing of value. A way to shop with eyes wide open.

SDG 16 SDG 17 *September, elected students*

MPs meet our student representatives

A delegation of MPs from the France-Bulgaria friendship groups met the school leadership, parent and staff representatives, and elected students. Listening to everyone and representing them in decisions is the heart of SDG 16.

NEWS

In France

Record heat and rising solar power, a back-to-school season all about energy

Photo Florian Pépellin, CC BY-SA 4.0

SDG 13 SDG 6 CLIMATE

A scorching September

According to Météo-France, September 2026 was the second hottest since 1900, after 2023, at 3.1 °C above normal. On 6 September, Lavaur, in the Tarn, recorded 40.3 °C, a national record for September.
Rainfall was about 70% below normal. Low rivers, cracked soil and thirsty forests, drought took hold across much of the country.

SDG 7 SDG 13 ENERGY

French solar passes 34 gigawatts

By the end of June 2026, France had a record 34 GW of solar panels installed. In the second quarter they produced 14.1 TWh, or 8.6% of the electricity consumed. Installed capacity has more than tripled in five years.
The flip side is that the energy plan published in February lowers the 2030 target to 48 GW, and the grid must learn to store the power that floods in during sunny hours.

of solar installed by end of June 2026

In class Compare the role of nuclear and solar power in the French and Bulgarian electricity mixes (pages 5 and 6). Two countries, two energy stories, one climate challenge.

NEWS

In Bulgaria

Sun, vultures and a pedestrian boulevard, sustainable news from our host country

SDG 7 SDG 9 ENERGY

When Bulgarian sunshine outstrips demand

On 8 October, solar plants produced nearly 4,300 MW, more than the country's entire demand at that moment. Large batteries store the midday surplus for the evening. As a result, net electricity exports jumped 62% in a year.

KEY FIGURE

36 %

of SDG targets are on track or making moderate progress, according to the UN's 2026 report.

Yet there is progress. 92% of humanity has access to electricity, internet access has risen from 40% to 74% since 2015, and nearly a billion people have gained access to safe drinking water.

And at the LVH? Our students also go from problem to solution, from recycling to the cycle lane requested from the city of Sofia (pages 2 to 4).

ACTING TOGETHER

Save the date

The big events of the autumn, a quiz and a challenge for everyone

19 to 30 Oct.
Biodiversity COP17 in Yerevan

9 to 20 Nov.
Climate COP31 in Antalya

11 and 12 Nov.
Heads of State Summit at COP31

1 Dec.
World AIDS Day

The quiz, true or false?

1. On 8 October, Bulgaria produced more solar electricity than it consumed.
2. The COP31 climate conference is in Brazil.
3. The wētāpunga is a New Zealand bird.
4. Cinereous vultures had not bred in the Eastern Rhodopes since 1993.
5. In London, the low emission zone is linked to fewer emergency hospital admissions.

Answers. 1 true, page 6. 2 false, Antalya in Türkiye, page 7. 3 false, it's an insect, page 8. 4 true, page 6. 5 true, page 9.

The ODDysée challenge

During the autumn holidays, pick up a tree leaf in Bulgaria, in town or in the mountains, and try to identify its species. Show it to the eco-delegates of your year group, who are preparing the next issue. The best ones will be featured!

CULTURE

Hugo's corner!

A text by Victor HUGO, then our favourite picks to read, watch and listen to

Sowing Season. Evening

SDG 2 SDG 12 SDG 15

Victor Hugo, Songs of the Streets and Woods, 1865

It is the hour of twilight.
Beneath a gateway, I admire
The fading day that lights
The final hour of labour.

In the fields, bathed in night,
I gaze, moved, upon the rags
Of an old man who casts by handfuls
The harvest-to-be in the furrows.

His tall dark silhouette
Looms over the deep furrows.
One feels how deeply he must trust
In the useful flight of days.

He walks across the vast plain,
Comes, goes, flings the seed afar,
Opens his hand, and starts again,
And I muse, a hidden witness,

While, unfurling all its veils,
The dusk, where murmurs blend,
Seems to stretch up to the stars
The sower's majestic gesture.

The old man is sowing a harvest he may never reap. Acting today for those who will come tomorrow is the very definition of sustainable development.
